

Bridging the Gap: Addressing Unmet Needs in Nasal Airway Obstruction and Chronic Rhinitis

Saturday, September 28th | 3:00 - 4:00PM EST

AAO Exhibit Hall, OTO Pavilion 2448, Miami Beach Convention Center

Bridge the gap in addressing chronic nasal conditions at AAO-HNSF 2024! Explore innovative solutions for persistent nasal airway obstruction & chronic rhinitis beyond traditional therapies. These options include VivAer® for managing NAO due to nasal valve collapse, inferior turbinate hypertrophy, and septal swell bodies, as well as RhinAer® for targeting the PNN, inferior turbinate, and septal swell bodies in the treatment of both allergic and non-allergic chronic rhinitis patients. Both VivAer and RhinAer utilize Aerin Medical's temperature-controlled radiofrequency (RF) technology, seamlessly integrating into both office and operating room settings. Attend to gain expert insights and real-world experience for informed treatment decisions.

Moderator:

Dennis M. Tang, MD, FARS

Assistant Professor, Cedars-Sinai
Co-Director, Sinus Center and
Anterior Skull Base Center
